DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1-4, 6, 7, 9-14, 16, 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Beavers.

Re claims 4, 6, 7, 9-14, Beavers discloses a first body portion (16, 18), a second body portion (14), mounting structure (28), an interface module (12), a strain relief yolk (26)

Re claims 1-3, 16, 17, Beavers discloses an interface module (12) coupled to a pressurized housing portion (14, 16, 18) of the electronic equipment enclosure and including a first wire connector half (38) of electronic equipment (40)

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 2831

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Beavers

The teaching of Beavers as discussed above does not disclose a handle.

It is well known in the electrical art to include a handle. It would have been obvious to one having ordinary skill in the art at the time the invention was made to include the handle with the enclosure of Beavers for the purpose of easily removing the top portion of the enclosure.

Claims 8, 15, 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beavers in view of Gryl, Jr. et al

The teaching of Beavers as discussed above does not disclose the interior portion of the interface module being filled with a sealing compound.

Gryl, Jr. et al disclose an interior portion of the interface module being filled with a sealing compound. It would have been obvious to one having ordinary skill in the art at the time the invention was made to include the sealing compound with the interface module of Beavers for the purpose of protecting the interface inside the module.
